PREFACE

This publication represents the second edition of the "Secondary Wood-Using Industries in Ontario", the first having been published in late 1968. The directory includes the secondary wood-using industries that operated in Ontario as of the first-half of 1980. The establishments listed in this directory are categorized alphabetically within Statistics Canada's Standard Industrial Classification codes, and geographically within the municipalities of the Province. Cross-referencing is provided.

The purpose of this directory is twofold. First, it is to give our primary wood-using industry establishments an identification of its major domestic market; and secondly, it is to assist users of finished or semi-finished wood products in identifying producers of these items for either domestic or export consumption.

The information contained herein has been obtained by scrutinizing four major sources:

- a) Statistics Canada's annual Census of Manufacturers, Ontario mailing lists;
- b) Scott's Industrial Directory, Ontario Manufacturers, Twelfth Edition;
- c) The 1979 Canadian Trade Index; and
- d) some 130 Yellow Pages directories of all Ontario communities.

While none of the above are all-inclusive listings of the members of these industries, we will not seek credit to have compiled an all-inclusive, up-to-date directory either. Any omissions, oversights, and/or errors are the direct responsibility of the publishers.

Suggestions and/or comments are welcomed for consideration for inclusion in future editions.
